A dimensioned home you can start with.

Ground-floor starter with exact room sizes and minimum targets.
Includes a guide to copying the PDF and making small changes.

STARTER MODEL DIMENSIONS

Outside width	**26 ft / 7.92 m**
Outside length	**32 ft / 9.75 m**
Ground floor area	**832 sq ft / 77.3 m²**
Clear wall height	**9 ft 2 in / 2.80 m**
Floor-to-floor target	**10 ft 6 in / 3.20 m**

FLOORS ARE YOUR CHOICE

This file demonstrates one complete ground floor.

Upload only this level to start, then add a clearly

labeled First Floor sheet later when you decide.

Use the room schedule on page 3 as the exact starter.

Make small edits to sizes or names in your own copy.

The 3D model is a planning visualization. Confirm

construction dimensions and local rules independently.

5 PAGES · PLAN · DIMENSION TABLE · HEIGHT / DOOR DEFAULTS · UPLOAD INSTRUCTIONS

Ground floor plan / exact starter

26 ft wide × 32 ft long · 12 connected spaces · ground-floor height target 2.80 m

EXACT ROOM GRID

Door arcs show leaf swing and clear opening.

Room doors: 3 ft; bath door: 2 ft 6 in.

Bathroom opens from the passage only.

Wall stays closed to kitchen and Bedroom 2.

Stairs are open from Living; wall closed to Bedroom 3.

D1 is the single garden-to-sitout entry.

ORIENTATION

Front / garden side is at the bottom.

North is toward the top of the page.

Room sizes / minimum defaults

All dimensions are clear internal planning sizes in feet; the model uses matching room footprints.

ROOM	MODEL SIZE	AREA	DEFAULT MINIMUM	USE / NOTES
Front Sitout	8 x 5 ft	40	4 x 5	One outside entry
Puja Room	10 x 5 ft	50	4 x 4	Room minimum planning target
Passage	8 x 5 ft	40	3 x 3	Room minimum planning target
Dining	8 x 7 ft	56	7 x 7	Room minimum planning target
Kitchen	10 x 7 ft	70	7 x 7	Room minimum planning target
Bath / WC	8 x 7 ft	56	5 x 7	Room minimum planning target
Living	8 x 10 ft	80	8 x 10	Room minimum planning target
Bedroom 1	10 x 10 ft	100	8 x 10	Room minimum planning target
Bedroom 2	8 x 10 ft	80	8 x 10	Room minimum planning target
Central Staircase	8 x 10 ft	80	6 x 9	16 risers, landing and rails
Bedroom 3	10 x 10 ft	100	8 x 10	Room minimum planning target
Family Lounge	8 x 10 ft	80	8 x 8	Room minimum planning target

GROUND FLOOR TOTAL / 832 sq ft

Every modeled room matches the size shown in the Model Size column. Minimums are defaults, not construction-code certification.

House dimensions / defaults

Use these defaults for the starter model; select another local standard only after checking your project needs.

Overall house envelope - minimum starter

Width	**26 ft / 7.92 m**
Length	**32 ft / 9.75 m**
Ground-floor area	**832 sq ft / 77.3 m²**
Clear room wall height	**9 ft 2 in / 2.80 m**
Floor-to-floor height	**10 ft 6 in / 3.20 m**

Door and circulation defaults

D1 Garden to sitout	3 ft 6 in x 7 ft	Only exterior house entry
Internal room door	3 ft x 7 ft	Typical bedroom / living
Bathroom door	2 ft 6 in x 7 ft	Clear width target
Window	4 ft 3 in x 3 ft 6 in	Sill 2 ft 11 in
Stairs	6 ft x 9 ft bay	16 risers, 0.90 m landing

One garden entrance

The ground floor has one exterior door, marked D1 at the front sitout. The path comes from the garden. All other exterior wall edges remain closed.

Room-to-room doors are interior connections and do not create additional garden entrances.

Optional upper floors

Upload the ground floor alone to begin. Add a First Floor page later; the model height then follows the number of selected levels.

These dimensions are illustrative planning defaults. Confirm structure, ventilation, fire egress, accessibility, and local code with a qualified professional.

Make your own copy / upload guide

You can use this ground floor as-is or copy its page and make small changes.

1 Keep the page structure

Start with one page titled Ground Floor. To add a level, duplicate the page and title it First Floor.

2 Use exact text labels

Inside each room cell, place its name one line above the size, e.g. Bedroom 1 then 8 ft x 10 ft. Keep one room label per cell.

3 Keep a regular grid

Align labels in rows and columns. Use the same width down each column and depth across each row. To add rooms, insert a row or column and update the overall footprint.

4 State size and mark stairs

Add: Overall footprint: 26 ft width x 32 ft depth. Mark the garden side and one D1 entry. Label Central Staircase on both levels.

5 Export, upload and review

Export a top-down vector PDF with selectable upright text. Edit room labels or sizes, then upload the edited copy. Add a First Floor page when ready and review the 3D result.

IMPORTANT: The importer reads labels and room sizes; it does not trace CAD walls or PDF door-swing symbols.

Doors use centered openings at shared room edges with standard widths. Compare the model with your drawing.
