Space plan

- Three levels with one continuous staircase core aligned floor-to-floor.
- Ground floor is dedicated to shared/common spaces, including kitchen and dining.
- First and second floors each provide 5 bedrooms and 4 washrooms.
- No balconies or projecting terraces are included on any level.
- Concept footprint: approximately 36 ft × 42 ft per floor.

GROUND FLOOR

Living • Dining • Kitchen
Utility • Guest/Flex • 4 washrooms

FIRST FLOOR

5 bedrooms • 4 washrooms • family lounge
aligned staircase

SECOND FLOOR

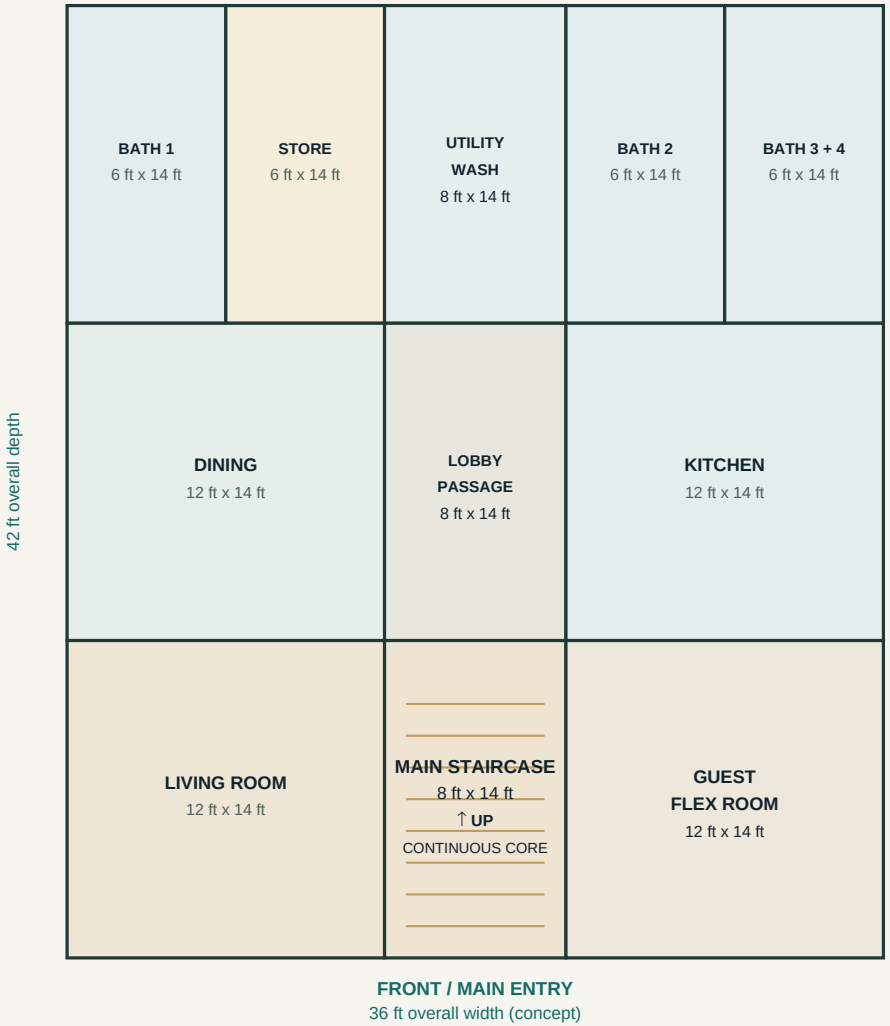
5 bedrooms • 4 washrooms • family lounge
aligned staircase

IMPORTANT

This is a structured concept, not a construction-ready architectural drawing. Room sizes, door swings, windows, ventilation, structure, setbacks, fire egress and local Kerala building rules must be checked by a licensed professional.

GROUND FLOOR / LEVEL 00

Common-use floor • kitchen and shared spaces • no balcony



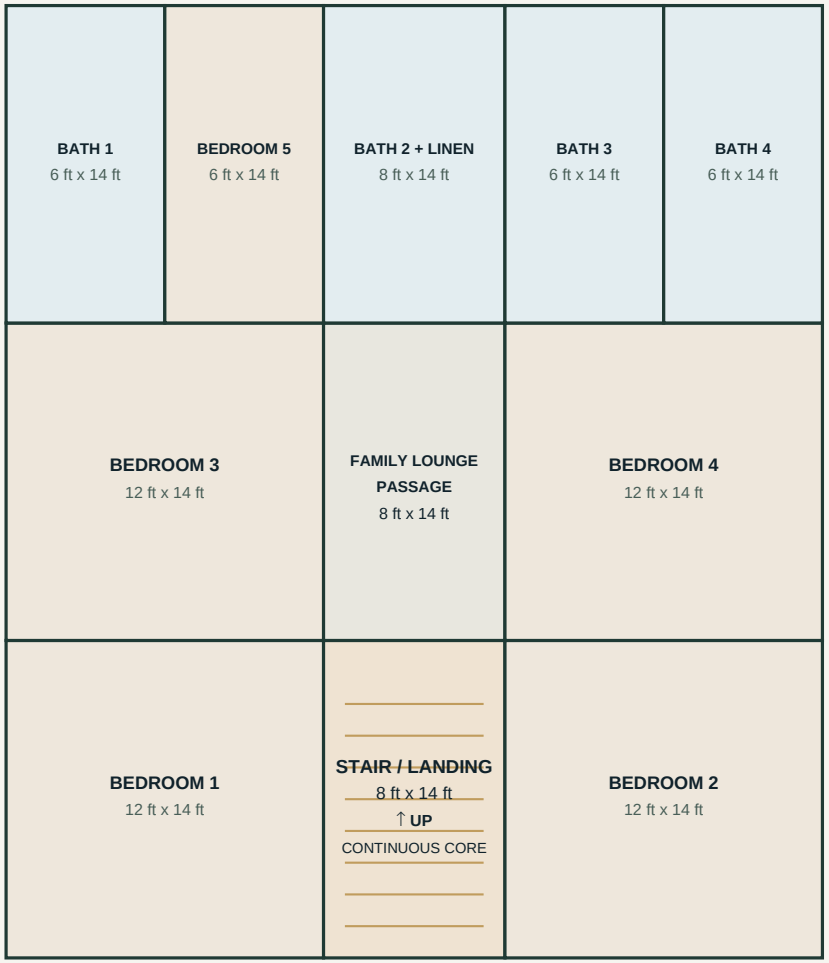
PLAN NOTES

- Ground floor: common living spaces, kitchen, dining, utility, guest/flex room and 4 washrooms.
- No balconies or projecting terraces on any level.
- Staircase stays in the same central position on all floors.
- Bathrooms are grouped toward the rear to simplify plumbing.
- Openings, doors, windows and structural columns are schematic only.
- A local architect/engineer must verify circulation, ventilation, setbacks, structure and code compliance.

* Bedroom 5 dimensions are illustrative and must be resized in a proper architectural layout.

FIRST FLOOR / LEVEL 01

Residential floor • 5 bedrooms + 4 washrooms • no balcony



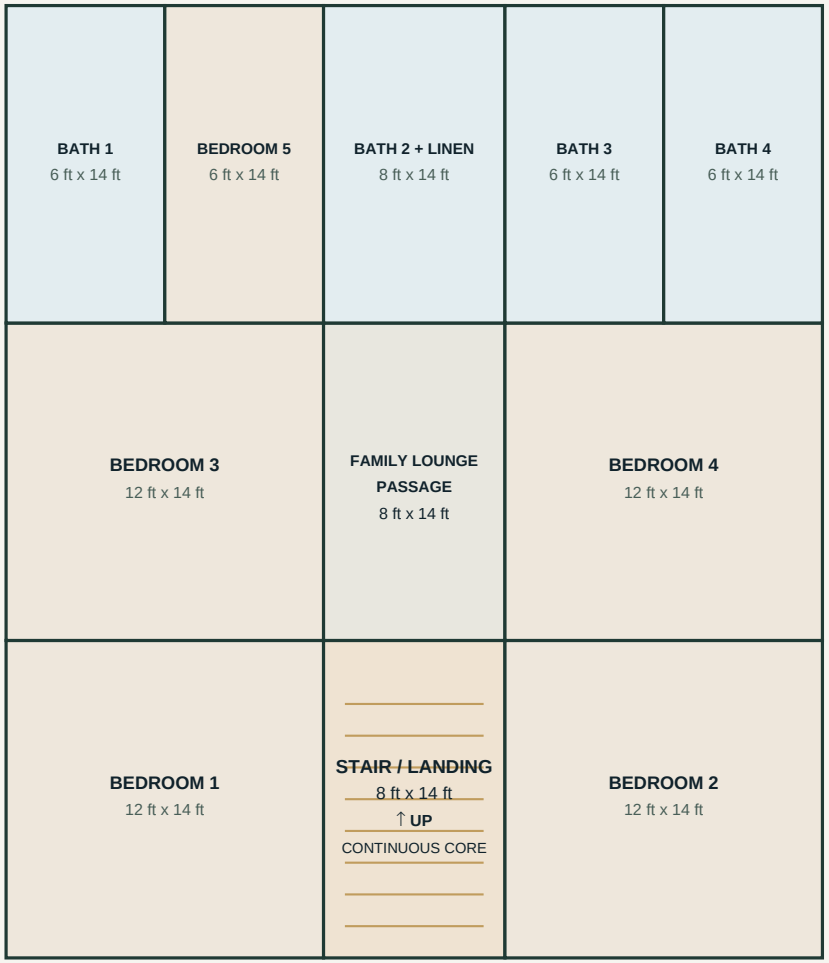
PLAN NOTES

- Upper floor: 5 bedrooms and 4 washrooms. Bedroom 5 is a compact concept space; dimensions need refinement.
- No balconies or projecting terraces on any level.
- Staircase stays in the same central position on all floors.
- Bathrooms are grouped toward the rear to simplify plumbing.
- Openings, doors, windows and structural columns are schematic only.
- A local architect/engineer must verify circulation, ventilation, setbacks, structure and code compliance.

* Bedroom 5 dimensions are illustrative and must be resized in a proper architectural layout.

SECOND FLOOR / LEVEL 02

Residential floor • 5 bedrooms + 4 washrooms • no balcony



PLAN NOTES

- Upper floor: 5 bedrooms and 4 washrooms. Bedroom 5 is a compact concept space; dimensions need refinement.
- No balconies or projecting terraces on any level.
- Staircase stays in the same central position on all floors.
- Bathrooms are grouped toward the rear to simplify plumbing.
- Openings, doors, windows and structural columns are schematic only.
- A local architect/engineer must verify circulation, ventilation, setbacks, structure and code compliance.

* Bedroom 5 dimensions are illustrative and must be resized in a proper architectural layout.

DESIGN & BUILD CHECKLIST

Use this sheet when refining the concept with an architect

Before turning this concept into a working drawing

01	Confirm the plot dimensions, road frontage, setbacks and permissible built-up area.
02	Decide whether the ground-floor four washrooms should be common, guest, or utility toilets.
03	Refine bedroom sizes and ensure each bathroom has access, privacy and ventilation.
04	Keep the staircase aligned vertically, with suitable width, landing sizes, headroom and handrails.
05	Align wet areas vertically where possible to reduce plumbing complexity.
06	Add wall thicknesses, door/window schedules, lintels, columns, beams and foundations.
07	Verify natural light, cross-ventilation, drainage, rainwater management and fire safety.
08	Have a licensed architect/structural engineer review and approve all drawings before construction.

The plan is schematic and not to scale; room dimensions are illustrative and need architectural coordination.
